

## HELPING ASSISTED LIVING COMMUNITIES EVOLVE AND THRIVE

### PROVEN EXPERTS

Leading organizations rely on KTS for its proven solutions

**LAHEY HEALTH SYSTEM**

**HALLMARK HEALTH**

**CAMBRIDGE HEALTH ALLIANCE**

**HILLSBOROUGH NURSING HOME**

## Serving healthcare facilities for more than three decades

The pandemic has sadly taken a toll on a variety of senior housing facilities, including assisted living communities. Today, these organizations are challenged with reconfiguring their communities to ensure they offer a safe environment for residents, as well

as reliable wireless communications so they can stay connected with loved ones. These efforts are critical to ensuring assisted living communities are better equipped to manage through the current pandemic, as well as potential future outbreaks.

KTS is here to help, offering reliable and highly effective solutions for everything from cohorting to communications infrastructure. With 35 years of experience working with leading hospitals and senior care facilities throughout the Greater Boston area, KTS has the expertise, training and services to quickly and safely provide the quality solutions needed to successfully navigate through this critical transition.

## Key Offerings for Assisted Living Communities

- **EFFECTIVE COVID-19 COHORTING SOLUTIONS** are now a critical need in assisted living communities. We offer solutions to establish separate spaces that can be used to separate residents from one another or from staff. We can quickly set up **portable walls** to establish these separate spaces; walls can be readily removed and stored when no longer needed.
- **STATE-OF-THE-ART INFECTION CONTROL SOLUTIONS** effectively manage indoor air quality and reduce the viral load to less-infectious levels.
- **ZOOM/COLLABORATION ROOMS** enable loved ones to communicate and enhance patient care, as doctors can communicate with the facility in a HIPAA controlled environment.
- **RELIABLE CELL COVERAGE AND WIRELESS ACCESS POINTS** enable staff to communicate with doctors and families, and residents to stay connected with family members.
- **TEMPLET DEVICE** easily and reliably checks temperatures from 1-1.5 feet away with no contact. Also offers facial recognition functionality and can detect if someone is not wearing a mask and request they put one on before entering.
- **SAFETY/SECURITY SYSTEMS** — **Closed-circuit TVs** and **Internet Protocol cameras** provide surveillance capabilities to protect residents and property; **mass notification and paging systems** aid in patient safety during an emergency; **access control solutions** provide control over who has access to specific areas; and **patient wandering protection systems** monitor the whereabouts of residents at risk of wandering.

# KTS: We **Connect** the Disconnect

Below is an overview of our service offerings. As experts in cabling and wiring, we have built on that expertise to solve related challenges that integrate into the communications infrastructure or establish new, separate networks.

## WHY KTS?

### PROVEN.

Leading hospitals and senior care facilities throughout Greater Boston have counted on KTS for more than 35 years for its expertise and consultative approach.

### RELIABLE.

We forge partnerships with our clients so you can count on us to do what we say when we say we will.

### QUALITY.

We're professionals providing superior customer service and quality workmanship. Work is done on time and with no trace left behind.

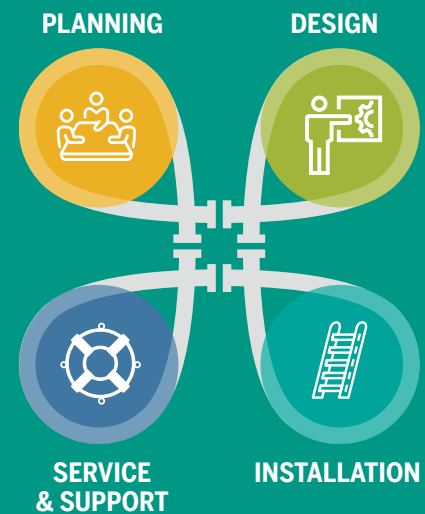

### HIGHLY TRAINED PROFESSIONALS.

We're experienced in hospital/senior care settings (HIPAA compliant), trained in infectious disease protocols, BICSI-certified RCDD (Registered Communications Distribution Designers) and BICSI-certified technicians. Everyone is CORI background checked.

### BEST-IN-CLASS SOLUTIONS.

We partner with best-in-class technology and solution providers to ensure we meet your needs and budget.

## FULL LIFECYCLE PARTNER

Our clients receive the most benefit when KTS is involved from the planning stage through installation and service.
